

Characteristic

Website visitors find your locations easier and quicker with PinPoint than in lists. PinPoint is operated intuitively. Locations get customized with your icons. They can be allocated to several legend categories. The zoom factor adjusts to the size of the location network automatically.

The data maintenance is executed via a password protected browser access. The initial location setup and its maintenance can be executed by CSV upload without any programming know-how. Automatic positioning of the addresses. Positions can be corrected and categories can be allocated by drag & drop.

PinPoint is adapted to prevalent and new browsers continuously. Updates get carried out frequently. Your location finder is always up to date.
